

# Equine

## Equine Science & Management

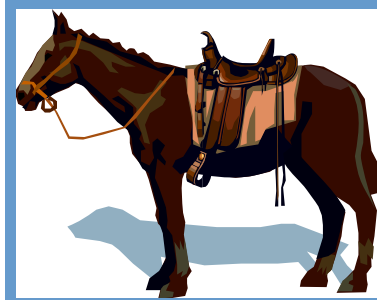

Experience the most comprehensive equine presentation to date. This interactive production includes seven all-encompassing sections: Real World Equine Careers, Equine Breeds, Management, Feeds & Feeding, Genetics, Reproduction and Evaluation. From vaccination schedules to fundamental hoof care, this creative combination of video, photographs, animation and text will be a sure fit for any horse enthusiast.

Collaborators:

Rebekah Bachman, West Texas A&M University; Lance Baker, Ph.D., West Texas A&M University; Doug Householder, Ph.

D., Texas Agricultural Extension Service; John Pipkin, Ph.D., West Texas A&M University; Kevin Pond, Ph.D., Texas Tech University. 270 min, 7 sections, 17 printable resources and 11 web resources.

CEV80108 (VHS/DVD) \$499.00

## Equine Management: Nutrition, Health, & Exercise

A healthy and safe horse is the result of maintaining the components indicative of a good management program. In the presentation, an equine expert discusses health factors, such as examinations, vaccinations, dewormers and signs of sickness and stress. Equine nutrition information, such as determining the quality of hay, amount fed, how often and additional nutritional feeds are discussed in depth. View different horse exercises essential to any equine program. Additionally, the duration of each exercise and psychology of learning for horses are addressed. A supplement is included. Collaborators:

Lance Baker, Ph.D., West Texas A&M

University; John Pipkin, Ph.D., West Texas A&M University. 25 min.

CEV00144 ((VHS/DVD) \$99.00

## Fundamental Horse Hoof Care

A world-renowned farrier discusses lower leg anatomy, parts of the hoof, proper hoof cleaning, how to hold the horse for the farrier, farrier selection and the farrier/client relationship. He also discusses proper trimming and shoeing, explains the importance of the environment and nutrition on the health of the hoof and shows how to apply hoof dressings. A supplement is included. Collaborator: Burney Chapman (1941-1999). 43 min.

CEV00108 (VHS/DVD) \$89.00

## Equine Reproduction

Understand the factors involved with conception and foaling with this program. Areas covered include selection of breeding stock, equine reproductive systems, sperm quality, estrus, pregnancy determination, gestational care and foaling. Live-action footage of a foaling and explanations of natural breeding and artificial insemination also are included in the exceptional videotape. Collaborator: Charlie Apter, Ph.D., Texas A&M University. 27 min. CEV00109 (VHS/DVD) \$115.00

## Equine Reproduction: Foaling

After watching the program, you will be able to recognize the signs of a mare beginning labor, to tell if delivery is progressing normally, and to know when either to help with the delivery or to call the veterinarian. You will also gain a better understanding of foaling problems such as maternal and fetal dystocia. Delivery and care of the foal are shown in vivid detail. A supplement is included.
