Child Care Basics—DVD

With the dual career and single parent families, the issue of child care is a vital concern. Students will become familiar with the standards, organizational goals, policies and procedures in the child-care industry, as well as learn licensing and accreditation standards. This DVD encourages students to investigate the varieties of child care possibilities available in most communities— preschool, child-care center, parent's day out, in-home care, self-care and government funded programs. Viewers learn the advantages and disadvantages of each type of care, along with what to look for before making a selection.

Child Care Worker: Recipe for Success

A child care operation is only as good as its workers. The program identifies the three major roles of a caregiver (maternal, therapeutic and instructional) and corresponding characteristic behaviors. Managers and directors of child care facilities explore how to look for and encourage these traits in their staff. Caregiver responsibilities are outlined, such as keeping the environment safe, knowledge of child development, good personal hygiene, attending to children's hygiene and using effective communicative skills. A supplement is included.

A Multi-State Curriculum Consortium

This is the Way We Wash Our Hands

Greatly reduce infectious diseases and food-borne illness in the child care center through one simple act— proper hand washing by children and workers. Learn the right way to wash hands and see how to incorporate creative activities encouraging children to join in good hand washing practices. A supplement is included.

Coating Environments for Learning & Play

Learn ways to give children the freedom to explore, be creative and have fun! The program focuses on six major areas: outdoor and indoor space; safety and health; family and community; staff; equipment and materials; and learning and play. Important experiences and activities (manipulatives, games, dramatic play, art, science, reading, field trips, resource people, media sources) are highlighted. Child care experts stress the roles and responsibilities of caregivers in this enriched environment. Questions and teaching strategies challenge viewers to make the child care experience the best it can be. A supplement is included.

Handling Hazards

Handling Hazards in Child Care—II

Continuing the workshop on OSHA standards and training, the program teaches four rules for the safe handling of body fluids, use of personal protection equipment, handling exposure incidents and confidential record keeping. In addition, viewers explore the use of Universal Precautions—an approach to infection control that focuses on use of barriers to protect the employees, correct hand washing procedures, proper disinfection of the environment and use of hazard control equipment, such as body fluid kits and playground kits. A supplement is included.

Handling Hazards in Child Care—I

Child care employees learn OSHA standards and training designed to establish a safe child care environment. During a hazard communication program workshop, employees learn definitions, understand the need to develop a safety attitude, become aware of products used at the center, and learn how to protect themselves and others. Duties and responsibilities of managers, supervisors and employees are explained. Other topics include container labeling, non-routine tasks and material safety data sheets (MSDS). A supplement is included.
